

**Notes:**

The room and the furniture are drawn to scale, though all rooms and furniture vary in size. Some rooms don't have the chases in the wall and are actually a bit larger. This should be used to give you an idea of how you'd like to set up your room, but you'll ultimately need to wait until move-in day to see how it will all work.

The beds are versatile and can be lofted, bunked, or lowered to standard heights. The beds are lofted by default, but you can change their heights when you move in. When the beds are lofted, the desks will fit underneath them. This will free up space in the room. The desk drawer units will fit under the desks, which will also free up room.
