

SOLE SOURCE PURCHASE

Truman State University is seeking bids for a Hansatech Oxygraph Plus Liquid Phase Photosynthesis and Respiration Measurement System for use within the Biology Department.

The items will be purchased to replace existing equipment used by students for instructional and research use. This equipment must also match and be compatible with the other existing equipment in the labs. The Biology Department is located within the School of Sciences and Mathematics on the University's campus. It is the University's understanding that PP Systems International (dba PP Systems) in Amesbury, Massachusetts is the only U.S. distributor that provides the items listed and are not available from any other source domestically.
