Truman Recognized by Kiplinger's Personal Finance Magazine

Kiplinger's Personal Finance magazine has listed Truman as 20th on its exclusive survey list of 100 best values in public colleges that "combine outstanding economic value with top-notch education."

The top 100 schools were selected from a pool of more than 500 public four-year colleges and universities and Truman is the only university in Missouri and the eight contiguous states listed in the top 40.

In the December 2008 issue, Truman is also ranked as the fifth best educational value for out-of-state students.

Kiplinger's Personal Finance based its rankings

on several measures of academic quality, such as ACT or SAT test scores, admission rates, freshman retention rates, student-faculty ratios and four- and six-year graduation rates.

They also ranked each school based on cost and financial aid factors.

In addition to doing their own reporting, Kiplinger's used data provided by more than 500 public four-year colleges and universities to Peterson's/ Nelnet.

To view the entire list, go to <http://www.kiplinger.com/money/collegevalues>.

The December issue will appear on newsstands Nov. 11.

Lyceum Series Continues with Canadian Brass

The Kohlenberg Lyceum Series returns Nov. 11 with a performance by award-winning musicians, Canadian Brass.

After forming in Toronto in 1970, the "fabulous five" have spent much of their time on tour, and have performed with many major symphony orchestras in the U.S., Europe and Japan.

Their sheer joy in playing the music they love is instantly transmitted to the audience, and often results in a fun-filled atmosphere that is sometimes rather atypical in classical music circles. Canadian Brass has an eclectic repertoire ranging from Bach to the Beatles.

Millions of television viewers have seen Canadian Brass on such programs as the Tonight Show, Today and Entertainment Tonight. They have appeared as guest artists on Evening at Pops with John Williams and the Boston Pops, as well

as numerous PBS specials.

Their many CDs can be found under their own record label, Opening Day Entertainment Group.

Lyceum tickets are free for all Truman students, faculty and staff. Starting Nov. 4, students may pick up their tickets from 9:30 a.m.-3:30 p.m. Monday through Friday at the Student Activities Board office in the Student Union Building.

Faculty and staff may pick up their tickets from 10:30 a.m.-8 p.m. Monday through Friday at the information desk in the Student Union Building.

General admission tickets will be on sale at Edna Campbell's and the Truman Business Office, McClain Hall 105, for the costs of \$7 for adults and \$4 for those 18 and under.

For more information go online to <http://lyceum.truman.edu>.

Truman Forensics Students Capture Three Championships at Creighton Tournament

A team of 20 members from the Truman Forensic Union captured three separate top honors along with several other awards at the Nebraska Double-Up tournaments hosted at Creighton University Oct. 24-26.

The team topped their list of awards with the tournament championship in debate sweepstakes and a second place finish in overall (combined debate and individual events) sweepstakes for the weekend.

In parliamentary debate, Truman secured two additional championships when junior Mark Buchheit and senior Chris Girouard took the tournament championship in the open division. Buchheit was also ranked top speaker in the tournament.

In other open division parliamentary debate competition, the team of sophomore Dylan Clark and freshman Ben Reid reached semifinals and the team of sophomores Sarah Backhaus and Christian Johns reached octafinals. In the junior division, junior Susan Presley and sophomore Mehdi Zaidi reached the quarterfinal round.

Backhaus was ranked eighth speaker in the open division, while Girouard was ranked 10th.

In individual speaking competition, freshman Darius Taylor took home sixth place in poetry interpretation in the Saturday portion of the tournament, and fifth place in the Sunday portion. Freshman Erin Williamson took sixth in informative speaking and freshman Elizabeth Hatting took fourth in persuasive speaking. In the Lincoln-Douglas debate, Reid reached the quarterfinals, while Johns was ranked fourth speaker and Backhaus was ranked fifth speaker.

Taylor and Williamson's placements qualify them to compete in their respective events at the National Forensic Association championships in April. They join Hatting, Reid and two additional teammates who have already earned previously announced qualifications.

The Truman Forensic Union is a co-curricular program open to any interested students, regardless of major or prior experience. For more information contact the Director of Forensics at 785.5677 or kminch@truman.edu.

Tom Carnahan to Speak During Global Entrepreneurship Week Nov. 17

Tom Carnahan, son of late Missouri Gov. Mel Carnahan and former U.S. Sen. Jean Carnahan, will give the keynote address for Global Entrepreneurship Week at 12:30 Nov. 17 in Violette Hall 1000.

Global Entrepreneurship Week, which runs from Nov. 17-23, is sponsored by the Kauffman Foundation to promote entrepreneurship and the entrepreneurial spirit. It is co-sponsored by the Kirksville Area Chamber of Commerce and the Missouri Rural Enterprise and Innovation Center.

Other events during the week include "Pitch It!" from 12-1 p.m. and 3-4 p.m. Nov. 18 in the Georgian Room, where students can receive feedback about their ideas. There will also be an Innovation Expo on Nov. 20 in the Georgian Room.

Formerly a real estate developer and lawyer, Tom Carnahan is now the founder and president of Wind Capital Group L.L.C., the first wind energy developer in Missouri. While wind energy was growing rapidly around the country, no one was developing projects in Missouri.

"I used to tell people about this, and they'd roll their eyes and look at me like I was crazy," Carnahan said. "It doesn't seem so crazy to

anybody anymore."

Today, Carnahan has 79 turbines spinning over farmland in northwestern Missouri. Wind Capital is currently undertaking four major projects, representing nearly \$300 million in development, Carnahan said. The projects will generate 162 megawatts of electricity, which is enough to power 100,000 homes. The staff at Wind Capital has grown as quickly as the turbines, with 18 employees in 2007, as compared to two employees in 2006. As a member of the American Wind Energy Association's Legislative and Policy Committee, Carnahan also keeps an eye on the energy policy debate in Washington, D.C.

"The important thing for people to understand is renewable energy like wind has to compete with other forms of energy that are also subsidized, like coal and gas," he said. "They all get different kinds of subsidies from government."

Despite Wind Capital's early success, some people still question whether wind power is more than the latest fad.

"I think that couldn't be further from the truth," Carnahan said. "We're powering real homes and creating real electrons every single day for sale in a competitive market."
