NSSE
NSSE 2023 Engagement Indicators
national survey of student engagement

## About Your Engagement Indicators Report

Engagement Indicators (EIs) provide a useful summary of the detailed information contained in your students' NSSE responses. By combining responses to related NSSE questions, each EI offers valuable information about a distinct aspect of student engagement. Ten indicators, based on three to eight survey questions each (a total of 47 survey questions), are organized into four broad themes as shown at right. The specific items within each EI are listed below, starting on page 5 .

## Report Sections

| Theme | Engagement Indicator |
| :--- | :--- |
| Academic Challenge | Higher-Order Learning <br> Reflective \& Integrative Learning <br> Learning Strategies <br> Quantitative Reasoning |
| Learning with Peers | Collaborative Learning <br> Discussions with Diverse Others |
| Experiences with Faculty | Student-Faculty Interaction <br> Effective Teaching Practices |
| Campus Environment | Quality of Interactions <br> Supportive Environment |

Overview (p. 3)
Displays how average EI scores for your students compare with those of students at your comparison group institutions.

Detailed views of EI scores within the four themes for your students and those at comparison group institutions. Three views offer varied insights into your EI scores:

## Mean Comparisons

Straightforward comparisons of average scores between your students and those at comparison group institutions, with tests of significance and effect sizes (see below).
Score Distributions
Box-and-whisker charts show the variation in scores within your institution and comparison groups.

Performance on Indicator Items
Responses to each item in a given EI are summarized for your institution and comparison groups.

Comparisons with High-
Performing Institutions (p. 15)

Comparisons of your students' average scores on each EI with those of students at institutions whose average scores were in the top $50 \%$ and top $10 \%$ of all current- and prior-year institutions.

Detailed Statistics (pp. 16-19)
Detailed information about EI score means, distributions, and tests of statistical significance.

## Interpreting Comparisons

Mean comparisons report both statistical significance and effect size. Effect size indicates the practical importance of an observed difference. For EI comparisons, NSSE research has concluded that an effect size of about .1 may be considered small, .3 medium, and .5 large (Rocconi \& Gonyea, 2018). Comparisons with an effect size of at least .3 in magnitude (before rounding) are highlighted in the Overview (p. 3).

EIs vary more among students within an institution than between institutions, like many experiences and outcomes in higher education. As a result, focusing attention on average scores alone amounts to examining the tip of the iceberg. It's equally important to understand how student engagement varies within your institution. Score distributions indicate how EI scores vary among your students and those in your comparison groups. Your NSSE Tableau dashboards and Report Builder (released in the fall) offer valuable perspectives on internal variation and help you investigate your students' engagement in depth.

## How Engagement Indicators are Computed

Each EI is scored on a 60-point scale. To produce an indicator score, the response set for each item is converted to a 60 -point scale (e.g., Never $=0$; Sometimes $=20$; Often $=40$; Very often $=60$ ), and the rescaled items are averaged. Thus a score of zero means a student responded at the bottom of the scale for every item in the EI, while a score of 60 indicates responses at the top of the scale on every item.

For more information on EIs and their psychometric properties, refer to the NSSE website: nsse.indiana.edu
Rocconi, L.M., \& Gonyea, R.M. (2018). Contextualizing effect sizes in the National Survey of Student Engagement: An empirical analysis. Research \& Practice in Assessment, 13 (Summer/Fall), pp. 22-38.

# NSSE 2023 Engagement Indicators 

## Overview <br> Truman State University

## Engagement Indicators: Overview

Engagement Indicators are summary measures based on sets of NSSE questions examining key dimensions of student engagement. The ten indicators are organized within four broad themes: Academic Challenge, Learning with Peers, Experiences with Faculty, and Campus Environment. The tables below compare average scores for your students with those in your comparison groups. Use the following key:

- Your students' average was significantly higher ( $p<.05$ ) with an effect size at least 3 in magnitude.
$\Delta$ Your students' average was significantly higher ( $p<.05$ ) with an effect size less than .3 in magnitude.
-- No significant difference.
$\nabla$ Your students' average was significantly lower $(p<.05)$ with an effect size less than .3 in magnitude.
$\nabla$ Your students' average was significantly lower $(p<.05)$ with an effect size at least .3 in magnitude.
Note: It is important to interpret the direction of differences relative to your institutional context. You may not see all of these symbols in your report.

# Academic Challenge <br> Truman State University 

## Academic Challenge: First-year students

Challenging intellectual and creative work is central to student learning and collegiate quality. Colleges and universities promote student learning by challenging and supporting them to engage in various forms of deep learning. Four Engagement Indicators are part of this theme: Higher-Order Learning, Reflective \& Integrative Learning, Learning Strategies, and Quantitative Reasoning. Below and on the next page are three views of your results alongside those of your comparison groups.

| Mean Comparisons | Truman | Your first-year students compared with |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | COPLAC |  | NatI Liberal Arts |  | NSSE 2022 \& 2023 |  |
|  | Mean | Mean | Effect size | Mean | Effect size | Mean | Effect size |
| Higher-Order Learning | 36.9 | 36.8 | . 01 | 39.4 ** | -. 20 | 38.3 | -. 10 |
| Reflective \& Integrative Learning | 34.5 | 34.3 | . 02 | $37.1{ }^{* * *}$ | -. 22 | 35.8 | -. 11 |
| Learning Strategies | 36.4 | 36.9 | -. 04 | 38.3 | -. 14 | 38.2 | -. 13 |
| Quantitative Reasoning | 28.1 | 27.5 | . 04 | 29.3 | -. 08 | 29.4 | -. 09 |

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; ${ }^{*} \mathrm{p}<.05,{ }^{* *} \mathrm{p}<.01,{ }^{* * *} \mathrm{p}<.001$ (2-tailed).

## Score Distributions

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25 th (bottom of box), 50 th (middle line), 75 th (top of box), and 95 th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

## Performance on Indicator Items

The table below displays how your students responded to each EI item, and the difference, in percentage points, between your students and those of your comparison group. Blue bars indicate how much higher your institution's percentage is from that of the comparison group. Dark red bars indicate how much lower your institution's percentage is from that of the comparison group.
Higher-Order Learning

## Reflective \& Integrative Learning

Percentage of students who responded that they "Very often" or "Often"...
2a. Combined ideas from different courses when completing assignments

2b. Connected your learning to societal problems or issues
2c. Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course
2c. discussions or assignments
2d. Examined the strengths and weaknesses of your own views on a topic or issue
Tried to better understand someone else's views by imagining how an issue looks from
2e. their perspective
2f. Learned something that changed the way you understand an issue or concept

2 g . Connected ideas from your courses to your prior experiences and knowledge

## Experiences with Faculty: First-year students

Students learn firsthand how experts think about and solve problems by interacting with faculty members inside and outside of instructional settings. As a result, faculty become role models, mentors, and guides for lifelong learning. In addition, effective teaching requires that faculty deliver course material and provide feedback in student-centered ways. Two Engagement Indicators investigate this theme: Student-Faculty Interaction and Effective Teaching Practices. Below are three views of your results alongside those of your comparison groups.

Campus Environment<br>Truman State University

## Campus Environment: First-year students

Students benefit and are more satisfied in supportive settings that cultivate positive relationships among students, faculty, and staff. Two Engagement Indicators investigate this theme: Quality of Interactions and Supportive Environment. Below are three views of your results alongside those of your comparison groups.

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; ${ }^{*} \mathrm{p}<.05,{ }^{* *} \mathrm{p}<.01,{ }^{* * *} \mathrm{p}<.001$ (2-tailed).

## Score Distributions

 scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

## Performance on Indicator Items

The table below displays how your students responded to each EI item, and the difference, in percentage points, between your students and those of your comparison group. Blue bars indicate how much higher your institution's percentage is from that of the comparison group. Dark red bars indicate how much lower your institution's percentage is from that of the comparison group.

NSSE
national survey of student engagement

# NSSE 2023 Engagement Indicators 

## Comparisons with High-Performing Institutions <br> Truman State University

## Comparisons with Top 50\% and Top 10\% Institutions

While NSSE's policy is not to rank institutions (see go.iu.edu/NSSE-PnP), the results below are designed to compare the engagement of your students with those attending two groups of institutions identified by $\operatorname{NSSE}^{\text {a }}$ for their high average levels of student engagement:
(a) institutions with average scores placing them in the top $50 \%$ of all 2022 and 2023 NSSE institutions, and
(b) institutions with average scores placing them in the top $10 \%$ of all 2022 and 2023 NSSE institutions.

While the average scores for most institutions are below the mean for the top $50 \%$ or top $10 \%$, your institution may show areas of distinction where your average student was as engaged as (or even more engaged than) the typical student at high-performing institutions. A check mark $(\checkmark)$ signifies those comparisons where your average score was at least comparable ${ }^{b}$ to that of the high-performing group. However, the presence of a check mark does not necessarily mean that your institution was a member of that group.

It should be noted that most of the variability in student engagement is within, not between, institutions. Even "high-performing" institutions have students with engagement levels below the average for all institutions.

| First-Year Students |  | Truman Mean | Your first-year students compared with |  |  |  |  |  |

a. Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).
b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.
c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the $95 \%$ CI (equal to the sample mean $+/-1.96 \times \mathrm{SE}$ ) is the range that is $95 \%$ likely to contain the true population mean.
d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.
e. Degrees of freedom used to compute the t -tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.
f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.
g. Effect size is the mean difference divided by the pooled standard deviation.

High-Impact Practices

## Truman State University

NSSE
national survey of NSSE 2023 High-Impact Practices student engagement

## About Your High-Impact Practices Report

Due to their positive associations with student learning and retention, certain undergraduate opportunities are designated "high-impact." High-Impact Practices (HIPs) share several traits: They demand considerable time and effort, facilitate learning outside of the classroom, require meaningful interactions with faculty and students, encourage collaboration with diverse others, and provide frequent and substantive feedback. As a result, participation in these practices has the potential to be very influential and rewarding (Kilgo et al., 2015; Kuh, 2008). NSSE founding director George Kuh recommends that institutions should aspire for all students to participate in at least two HIPs over the course of their undergraduate experience-one during the first year and one in the context of their major (NSSE, 2007).

NSSE asks students about their participation in the six HIPs shown in the box at right. Unlike most questions on the NSSE survey, the HIP questions are not limited to the current school year. Thus, senior students' responses include participation from prior years.

About This Report

## High-Impact Practices in NSSE

## Service-Learning

Courses that included a community-based project

## Learning Community

Formal program where groups of students take two or more classes together

Research with Faculty
Work with a faculty member on a research project
Internship or Field Experience
Internship, co-op, field experience, student teaching, or clinical placement

Study Abroad
Culminating Senior Experience
Capstone course, senior project or thesis, portfolio, recital, comprehensive exam, etc.

## Report Sections

Participation Comparisons (p. 3)

Response Detail (pp. 4-5)

Participation by Student Social Identities and Experiences (p. 6-End)

Displays HIP participation for your students compared with that of students at your comparison group institutions. Two views present insights into your students' HIP participation:

## Overall HIP Participation

Displays the percentage of students who participated in one HIP and in two or more HIPs, relative to those at your comparison group institutions.

## Statistical Comparisons

Comparisons of participation in each HIP and overall for your students relative to those at comparison group institutions, with tests of significance and effect sizes.

Provides complete response frequencies for the relevant HIP questions for your students and those at your comparison group institutions. First-year results include a summary of their expectations for future HIP participation.

Displays your students' participation in each HIP by selected student social identities and experiences.

## Interpreting Comparisons

HIP participation varies more among students within an institution than it does between institutions, like many experiences and outcomes in higher education. As a result, focusing attention on overall participation rates amounts to examining the tip of the iceberg. It is equally important to understand how student engagement (including HIP participation) varies within your institution. The table beginning on page 6 provides an initial look at how HIP participation varies by selected student social identities and experiences. Your NSSE Tableau dashboard and Report Builder (released in the fall) offer further perspectives on internal variation to help you investigate your students' HIP participation in depth.

Participation Comparisons

Truman State University

## Overall HIP Participation

The figures below display the level of participation of students in High-Impact Practices. Both figures include participation in service-learning, learning communities, and research with faculty. The senior figure also includes participation in internships or field experiences, study abroad, and culminating senior experiences. The first segment in each bar shows the percentage who participated in at least two HIPs, and the full bar (both colors) represents the percentage who participated in at least one.

## Statistical Comparisons

The table below displays the percentage of your students who participated in a given High-Impact Practice, including the percentage who participated in at least one or in two or more HIPs. It also graphs the difference, in percentage points, between your students and those of your comparison groups. Blue bars indicate how much higher your institution's percentage is compared to the comparison group. Dark red bars indicate how much lower your institution's percentage is compared to the comparison group. (Comparison group percentages appear on the following pages.)

Your students' participation compared with:

[^8][^9]NSSE
national survey of student engagement

## First-year students

## Service-Learning

About how many of your courses at this institution have included a communitybased project (servicelearning)?

Learning Community
Participate in a learning community or some other formal program where groups of students take two or more classes together.

## Research with a Faculty Member

Work with a faculty member on a research project.

## Plans to Participate ${ }^{\text {a }}$

Knowing whether first-year students plan to participate in upper-division HIPs can reveal insights about HIP demand, awareness of opportunities, and the clarity of institutional information. These results might also point to topics for additional exploration, such as what contributes to students' expectations, their assumptions about who can participate, or why other students are undecided or have no plans to participate in the activity.

## Internship or Field

## Experience

Participate in an internship, co-op, field experience, student teaching, or clinical

## Percentage responding "Plan to do"

## Culminating Senior

 ExperienceComplete a culminating senior experience (capstone course, senior project or thesis, portfolio, recital, comprehensive exam, etc.).

[^10]Note: Results weighted by institution-reported sex (including "Another" and "Unknown" when provided) and enrollment status (and institutional size for comparison groups).

sex and enrollment status. Percentages are within-group and can be read, for example, "X \% of business major respondents participated in a learning community."

b. Institution-reported variable
c. No parent, guardian, or person who raised you holds a bachelor's degree.
e. Based on responses to "How would you evaluate your entire educational experience at this institution?"

[^0]:    Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75 th (top of box), and 95 th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

[^1]:    Notes: Refer to your Frequencies and Statistical Comparisons report for full distributions and significance tests. Item numbering corresponds to the survey facsimile available on the NSSE website.
    a. Percentage point difference $=$ Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0 .

[^2]:    Notes: Refer to your Frequencies and Statistical Comparisons report for full distributions and significance tests. Item numbering corresponds to the survey facsimile available on the NSSE website.
    a. Percentage point difference $=$ Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0 .

[^3]:    Notes: Refer to your Frequencies and Statistical Comparisons report for full distributions and significance tests. Item numbering corresponds to the survey facsimile available on the NSSE website.
    a. Percentage point difference = Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0 .

[^4]:    Notes: Refer to your Frequencies and Statistical Comparisons report for full distributions and significance tests. Item numbering corresponds to the survey facsimile available on the NSSE website.
    a. Percentage point difference = Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0 .

[^5]:    Notes: Refer to your Frequencies and Statistical Comparisons report for full distributions and significance tests. Item numbering corresponds to the survey facsimile available on the NSSE website.
    a. Percentage point difference = Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0 .

[^6]:    Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by the pooled standard deviation; ${ }^{*} \mathrm{p}<.05,{ }^{* *} \mathrm{p}<.01,{ }^{* * *} \mathrm{p}<.001$ (2-tailed).
    a. Precision-weighted means were used to determine the top $50 \%$ and top $10 \%$ institutions for each Engagement Indicator from all current- and prior-year institutions, separately by class. Using this method, Engagement Indicator scores of institutions with relatively large standard errors were adjusted toward the mean of all students, while those with smaller standard errors received smaller corrections. As a result, schools with less stable data-even those with high average scores-may not be among the top scorers. NSSE does not publish the names of the top $50 \%$ and top $10 \%$ institutions because of our commitment not to release institutional results and our policy against ranking institutions.
    b. Check marks are assigned to comparisons that are either positive or non-significant with an effect size $>-.10$.

[^8]:    a. Percentage point differences (institution - comp. group) rounded to whole numbers. Values less than one may not display a bar and may be shown as +0 or -0 .
    b. Cohen's $h$ (standardized difference between two proportions). Effect sizes indicate the practical importance of observed differences. For service-learning, internships, study abroad, and culminating senior experiences, an ES of about .2 may be considered small, .5 medium, and .8 large. For learning community and research with faculty, an ES of about .1 may be considered small, .3 medium, and .5 large (Rocconi \& Gonyea, 2018).
    ${ }^{*} p<.05,{ }^{* *} p<.01,{ }^{* * *} p<.001$ ( $z$ - test comparing participation rates).

[^9]:    Note: Participation includes the percentage of students who responded "done or in progress" except for service-learning which is the percentage who responded that at least "some" courses included a community-based project. All results weighted by institution-reported sex and enrollment status (and by institution size for comparison groups).

[^10]:    a. Refer to your Frequencies and Statistical Comparisons for details on the other response options.

[^11]:    Note: Results weighted by institution-reported sex (including "Another" and "Unknown" when provided) and enrollment status (and institutional size for comparison groups).
