of Business Administration  
majors have more than one  
concentration

“ Truman State's Business Administration program was a perfect blend of rigorous learning and professional networking for me. In my upper level courses, I was constantly challenged to look at a question more analytically to gain a deeper understanding of what was being asked of me; this is a skill that is invaluable in any workplace. Throughout my time in the Business Administration program, I felt myself grow in knowledge not only as a business student, but also as a writer, thinker, and professional. In addition to the challenging but rewarding coursework, I was able to make genuine connections with several of my professors which was vital when I needed recommendations for jobs and graduate programs. I am extremely grateful for their guidance regarding my future opportunities and the kind words that they supplied on my behalf. ”

— JOHN KUSMEC
