

## Computer Science at Truman

### Degrees offered

# BS

Computer Science

# 250

approximate  
number of students  
in the major

# 82

approximate  
number of students  
pursuing one of  
these minors

### Notable employers

- Cerner
- Boeing
- Amazon
- AT&T
- IBM
- Garmin
- CarFax
- Facebook
- DISH Network
- Twitter
- Google
- Principal Financial

Students complete research through **individual software development projects**, **Research Experiences for Undergraduates (REU's)**, or **personalized research experiences** with **one-on-one faculty mentorship**.

### Minors offered

Computer Science,  
Cognitive Science,  
Information Systems,  
and Mathematical  
Biology

# 7

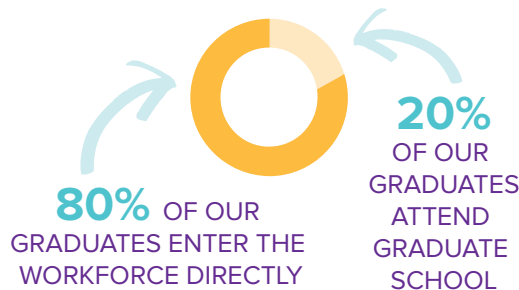

full-time faculty  
members

# 100%

of faculty have a  
terminal degree

of majors complete  
an internship

Recent internships include Google, Cerner, Boeing, Principal Financial, DISH Network, Facebook, and Amazon.

“The computer science department here at Truman is fantastic. The professors truly care about you in the classroom as a student, and outside of the classroom as a person with your own ideas and interests. Many of the professors I have had in class will stop me in the hallways to talk for a few minutes between classes and just ask me how my day is going. This has been a big help in developing the communication and people skills that will be necessary at any job. Having my professors go out of their way to reach out from outside of the classroom means a lot.”

— AUSTIN JARRETT, graduating class of Summer 2019

Pursuing at Truman: Computer Science major, research to develop a device that will monitor available parking spaces through the Computer Science department  
Student organizations: Beta Theta Pi, Student Ambassadors, Club Rugby  
Hometown: Springfield, Missouri
