

Computer Science at Truman

 DISTINCT BY DESIGN

Degrees offered

BS
Computer Science

Minors offered

Computer Science,
Cognitive Science,
Information Systems,
and Mathematical
Biology

of majors complete
an internship

200

approximate
number of
students in the
major

82

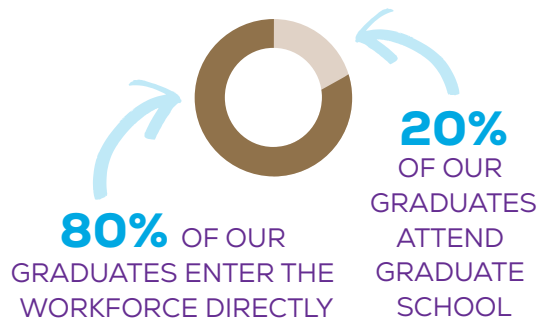

approximate
number of students
pursuing one of
these minors

6

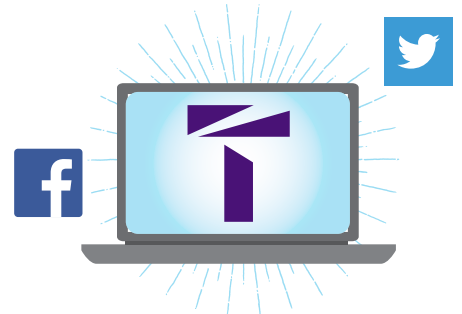

full-time faculty
members

100%

of faculty have a
terminal degree

Recent internships include Google,
Cerner, Boeing, Principal Financial,
DISH Network, Facebook, and Amazon.

Notable employers

- Cerner
- Boeing
- Amazon
- AT&T
- IBM
- Garmin
- CarFax
- Facebook
- DISH Network
- Twitter
- Google
- Principal Financial

Students complete
research through
**individual software
development projects,
Research Experiences for
Undergraduates (REU's),
or personalized research
experiences with
one-on-one faculty
mentorship.**

“ The professors truly care about you in the classroom as a student, and outside of the classroom as a person with your own ideas and interests. Many of the professors I have had in class will stop me in the hallways to talk for a few minutes between classes and just ask me how my day is going. This has been a big help in developing the communication and people skills that will be necessary at any job. Having my professors go out of their way to reach out from outside of the classroom means a lot. ”

– **AUSTIN JARRETT**, graduating class of Summer 2019

Academic Interests: Computer Science major, research to develop a device that will monitor available parking spaces through the Computer Science department

Student organizations: Beta Theta Pi,
Student Ambassadors, Club Rugby

Hometown: Springfield, Missouri
